when received.*

### **Android Java Programming for Beginners Course Offered at Northwest Iowa Community College**

This course is perfect for you if you are a beginner who wants to use Java to create Android applications. Topics you will learn include: setting up your computer for Android programming, creating Android programs, manifest basics, input and output using structured Java layouts and pre-made I/O facilities, using variables and primitive types, strings, programming decisions, using loops, using basic arrays, creating functions, and using classes. It is assumed that participants will have some knowledge and understanding of basic programming concepts such as variables, types, loops, and decision structures. Participants need to bring a laptop computer and an Android device that has at least Android version 2.2 (computers and Android devices are not supplied during the course).

#### Class information:

- This course will be 8 sessions on Tuesdays, September 23 to November 11 from 6:00 – 8:30pm at Northwest Iowa Community College in Room 339C, Section #42371
- Cost: \$199
- Instructor: Rodney Crater

**To register: Call Northwest Iowa Community College at 712-324-5061 or 800-352-4907 and ask for Continuing Education.**
