

Additional Important Information – Automotive & Light Duty Diesel Technology

All students are required to purchase a laptop computer from the NCC College Store to be enrolled in the Automotive & Light Duty Technology program.

- The computer required has specific system requirements and will contain specialized software that is required for curriculum and benefits other courses within the curriculum by minimizing hard-copy expenses for the student.
- The software is pre-installed at no additional expense.
- The computer and specialized software will be serviced/warranty and maintained by the Information Technology (IT) Department.
- The computer can also serve as a personal computer containing Microsoft Windows software and can be utilized for homework for all courses, e-mail, etc.
- Because Automotive & Light Duty Diesel Technology students are required to have the laptop computer for the first day of class, your instructor will make arrangements to take the class to the NCC College Store that day to purchase your laptop.
- You will need to make arrangements to pay for the laptop in full at the time of purchase. The estimated cost range for the computer is \$725.00-\$825.00. Prices to be bid in summer prior to fall enrollment.
